LS TEPATO SYSTEMS, INC
DATA & TECHNOLOGY SOLUTIONS FOR SMALL BUSINESS

July 2007

Tepato Systems offers software consulting services to help you, the Safari Club International Chapter. If you want to make better financial decisions, software and other technology tools should be key parts of your chapter strategy.

Improving Your Fundraiser Auctions
Track your Donors, Items & Results

How effectively are you tracking your donors and their donations for your annual fundraising event? Are your board members getting burned out from too much paperwork? Do you have trouble figuring out which items were profitable and which items were not?

Tepato has something that can help - a database to keep track of who donated what item, when, and the profit/loss you made on it. The Tepato Auction Database enables you to do all of the following tasks quickly and accurately:

- *Create "thank you" letters for all of this year's donors*
- *Create mailings to donors for next year's event*
- *Create bid sheets for silent auction items*
- *Create script for auctioneer for live auction items*
- *Create reports to show the cost of each item, the winning bid you accepted for it, and the profit, if any*

Contact Tepato Systems for a demonstration of this database. Your current data (donors, items, etc.) can be imported into the database for you as a starting point. Custom reports or additional functionality are also available, just tell us what you need...

SCI Flint website wins 3rd place at 2007 Convention
A Tepato Systems site...

Tepato Systems created the SCI Flint site in 2004 and still supports the site's ongoing maintenance. See this article for the details of the 3rd place award:

If your chapter doesn't have a website, you should definitely have one, and we can help. If you do have a site, but the Chapter's Board of Directors doesn't have the time or the skills to keep it up to date, contact us.

All of the sites listed below are Tepato sites. Feel free to contact the chapter president of any of these chapters to ask them what they think of Tepato Systems.
